

Kaba Introduces The New LearnLok™ Feature to its E-Plex PROX-based Locks

Winston-Salem, NC (May 08, 2009)

Kaba Access Control is pleased to announce the addition of its new LearnLok™ feature to the E-Plex PROX-based E5700 series electronic locks, E5770 series SACs (Stand-Alone Access Controller) and the newly introduced E3700 series narrow stile electronic locks.

The LearnLok™ feature simplifies programming of up to 300 user credentials (HID PROX cards, fobs, etc.) per door by “learning” them right at the lock’s reader without the use of software and related lock programming devices. As customers’ needs grow or the need for audits, schedules, time zones, etc. arises, these same locks can be upgraded with optional software to accommodate up to 3,000 users/30,000 audit events per door.

To find out more about the E-Plex LearnLok™ feature, please consult with a Kaba E-Plex Dealer, visit our website at www.kabaaccess.com or call us at 800-849-8324 or 336-725-1331.
