Ilco® Electronic Cloneable Key System

The most expensive component of transponder and electronic keys is the chip or electronics contained in the head. An Ilco electronic key provides the benefit of lower inventory cost. One head, 14 blades covers 17 makes and over 190 models.

- Clone previously “un-cloneable” transponder keys at the counter using Ilco electronic keys and a RW4 or Ilco EZ®-Clone* equipment (no PC, internet connection, or software purchase required).
- Eliminate the need for two functioning keys that are required for On-Board Programming.
- Key head contains a replaceable, lithium[†] battery (CR1632).
- Mis-cuts, no problem, simply discard the blade, reuse the head.
- Modern, sleek, two-part key design, proportionally sized to original key.
- Made in the USA

Visit the Ilco web site often for the latest references, manuals and guides.

* RW3 owners will need a PC with Tex Cloning software installed. This will not be required if your RW3 has been “factory upgraded”. RW2 owners must have a Tex-Code Advanced module and a PC with Tex Cloning software installed.

[†]Ilco recommends battery replacement every two years to ensure trouble free operation.

Electronic Key Cloning Assortment includes (5) EH3 key heads, (4) A-Y160, (3) B-H72, (4) D-H84, (3) E-TOY43, (1) C-H73, (2) H-NI02, (1) J-MAZ24, (2) K-MIT8, (2) L-MIT9, (2) P-SUB4, and (1) M-MIT14.

Assortment is packed in a plastic case w/ adjustable compartments.
